

HOW DID IT GO?
TEACHER'S REVIEW OF THE LESSON PLAN

Time for Teacher Reflection

After the Lesson Plan has been implemented in a classroom, an assessment of how the Lesson Plan 'worked' is a valuable review tool for teachers.

This review component pertains to the Lesson Plan in its entirety (i.e., instruction time, activities, assessment, etc.).

Please reflect upon the connections between the Learning Outcomes, content, instruction, activities, and assessment to confirm student success or where challenges remain for some students. Taking time to reflect on how the lesson went (e.g., 'Assessment for Learning') is crucial to future planning for your students' education journeys.

i) Did the students achieve the Learning Outcomes?
